WolframAlpha

calculate((t^4−12t+21), t=(0..8))

Input interpretation:

$$\left\{ t^4 - 12\,t + 21,\ t = \boxed{\text{arithmetic progression}}\ \boxed{0 \text{ to } 8}\ \boxed{\text{step size}}\ \boxed{1}\ \right\}$$

Result:

$$\left\{ t^4 - 12\,t + 21,\ t = \{0,\ 1,\ 2,\ 3,\ 4,\ 5,\ 6,\ 7,\ 8\} \right\}$$
